

SHAYA

PERSONAL BRAND GUIDELINES

Midnight Archive / Version 1.0

TRACE WHAT OTHERS MISS.

A trusted investigator for hard systems

SHAYA turns uncertain technical systems into clear, tested results.

Brand promise

Make complex work easier to inspect, understand, and trust.

EXACT

Claims use evidence.

CALM

The system does not shout.

CURIOUS

Look beyond the first answer.

PRACTICAL

Each idea must lead to a useful result.

INDEPENDENT

Direct, clear, and willing to state limits.

Follow the evidence through the dark

01

THE ARCH

The problem boundary. It contains the unknown.

02

THE SQUARE

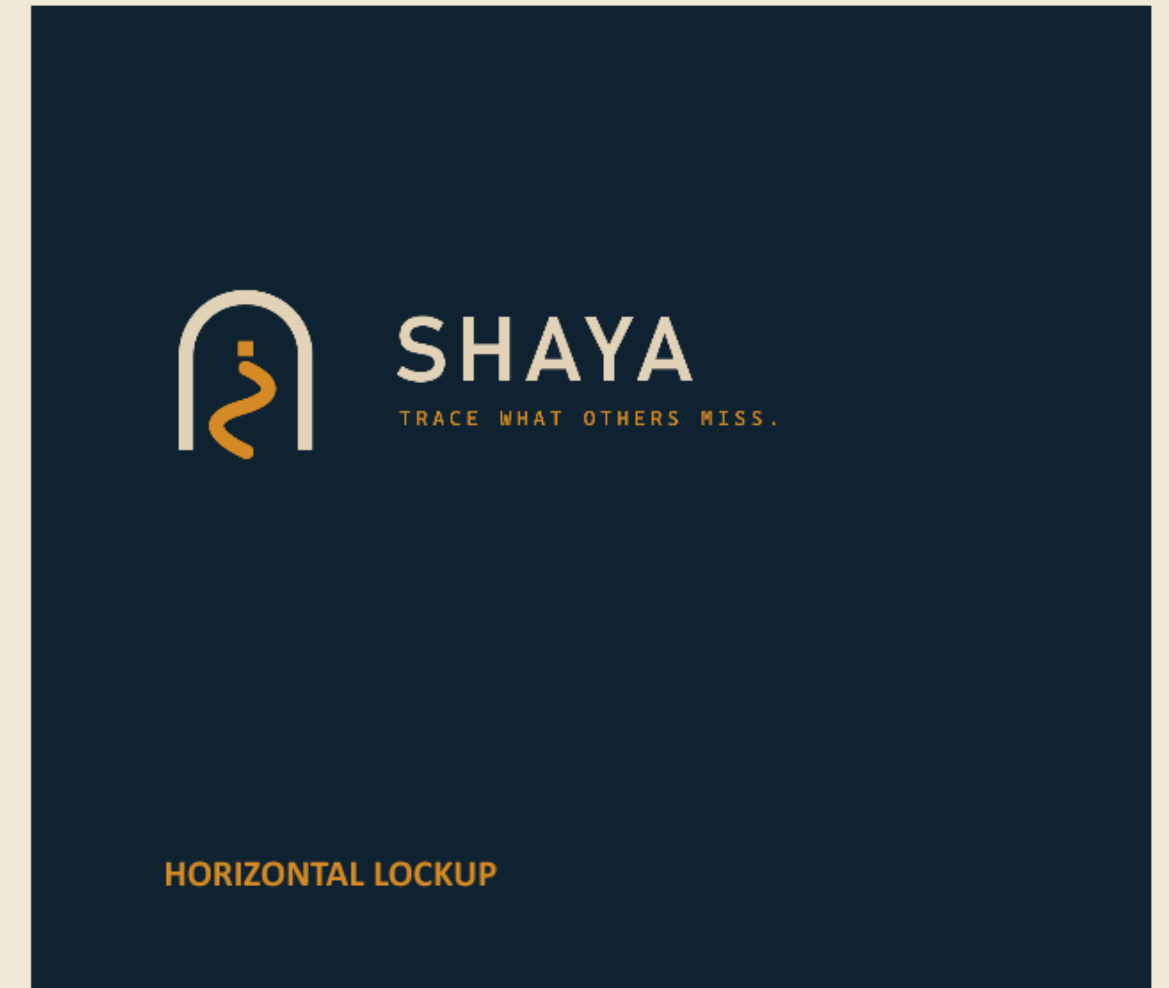

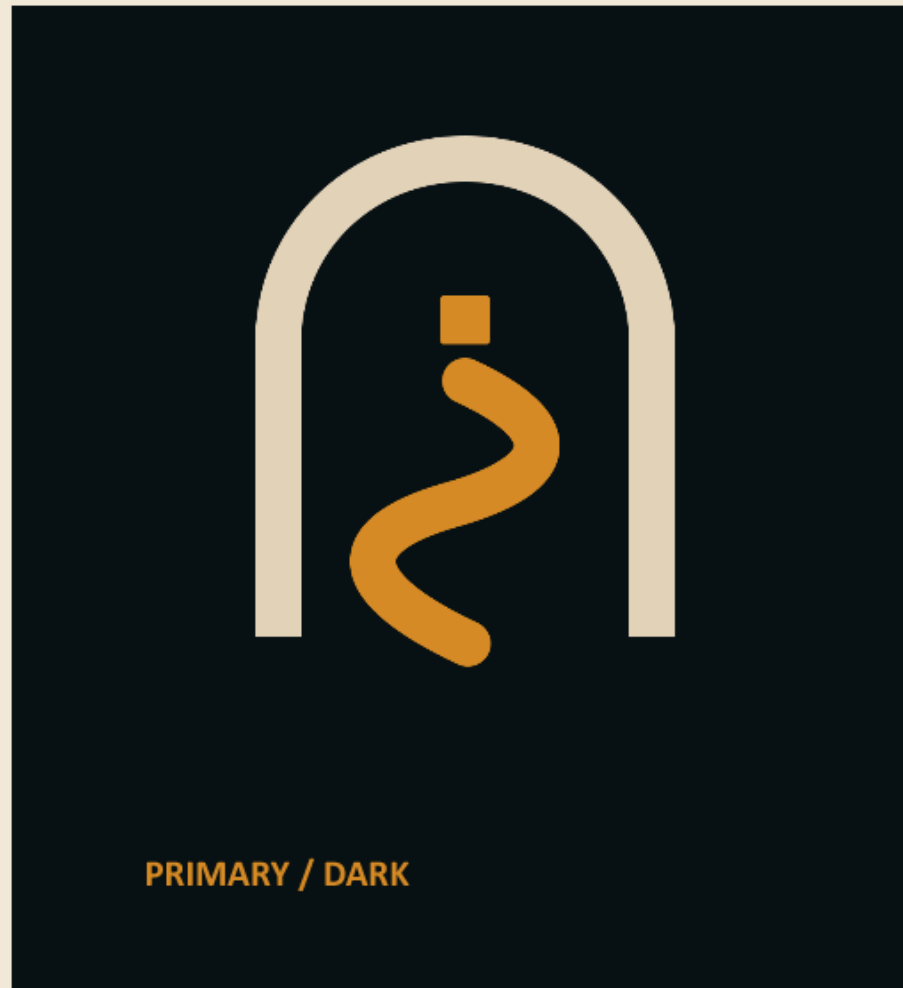

Verified evidence. Small, clear, and fixed.

03

THE TRACE

The path from uncertainty to a result that others can inspect.

Use the mark as a calm signal, not a badge

Use one logo form per surface. Do not combine the mark and wordmark twice.

Preserve space so the trace stays legible

CLEAR SPACE

Keep one amber-square unit around every side of the mark.

MINIMUM SIZE

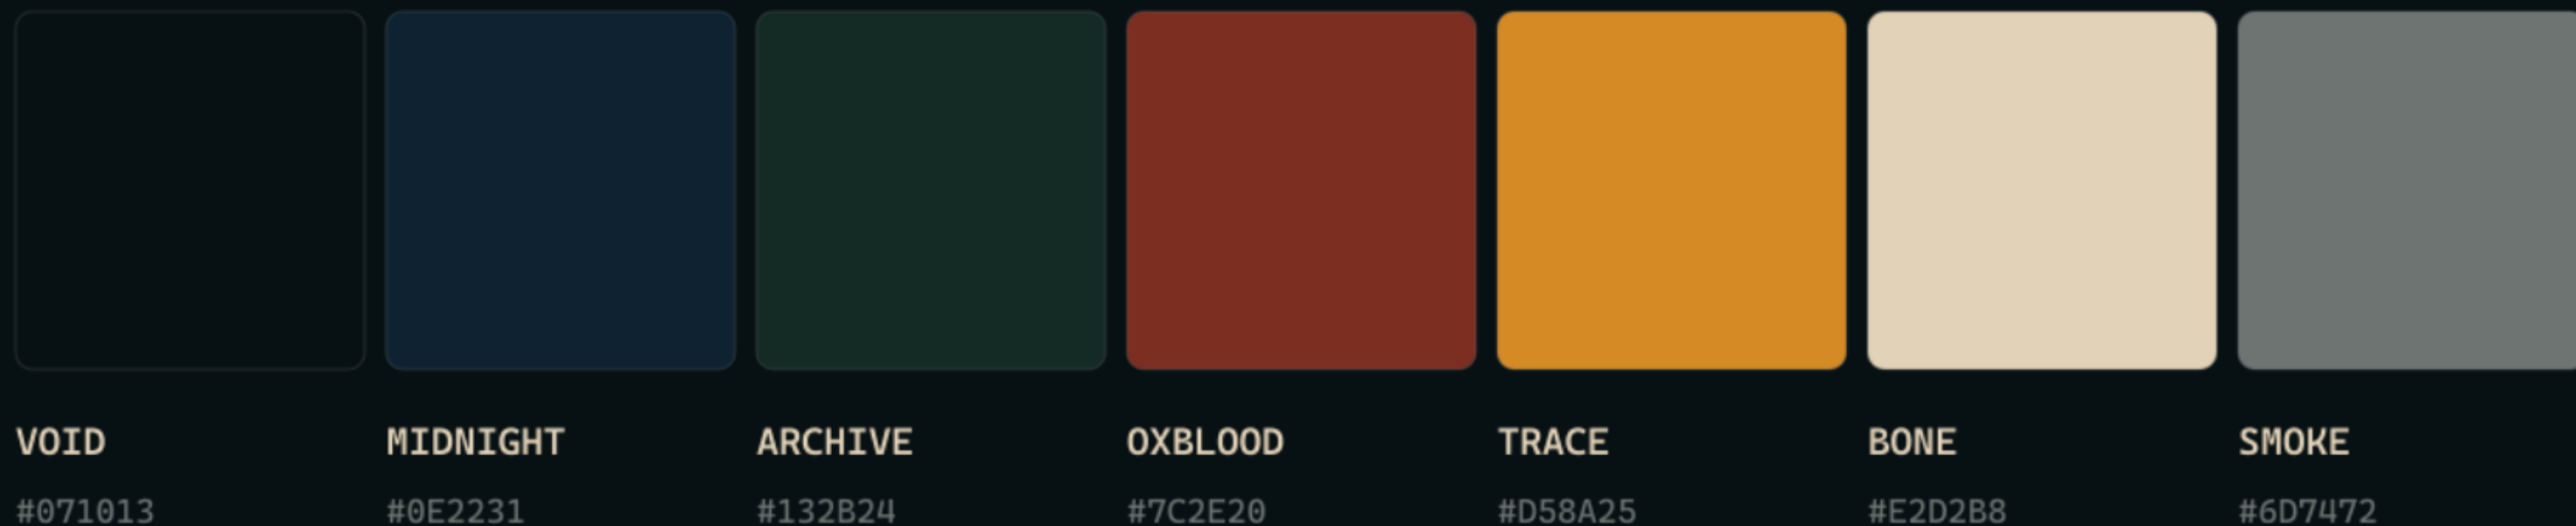

Digital mark: 24 px
GitHub avatar: 32 px
Printed mark: 8 mm

Never crop the arch or reduce the trace to a thin line.

CLEAR SPACE = ONE AMBER SQUARE ON EVERY SIDE

The palette starts in shadow and resolves in amber

75%

Void, Midnight, and Archive

18%

Bone for text and space

7%

Trace and Oxblood accents

Technical, but never mechanical

BAHNSCHRIFT

Display and wordmark
Uppercase / short lines / moderate tracking

Segoe UI

Body copy should use short sentences and clear scope.

CASCADIA MONO

scope: focused
result: verified
claim: bounded

Use for commands, evidence labels, and small technical details.

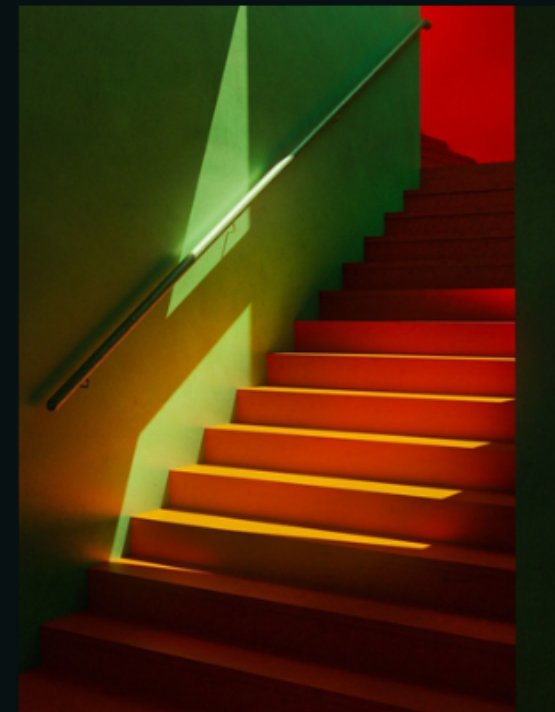

Quiet technical stories

Use

- Doorways and arches
- Quiet rooms and forest paths
- One controlled light source
- Matte texture and clear silhouettes
- Deep shadows with visible detail

Avoid

Purple AI glow, robots, code rain, glossy 3D, and busy dashboards.

User-provided PinVault references. Use for direction only.

Calm, direct, and evidence-first

WRITE LIKE THIS

"The focused test passed on the current branch."

"The result supports the component, not the full live system."

"The root cause is not confirmed."

DO NOT WRITE LIKE THIS

"This revolutionary solution changes everything."

"The system is definitely fixed."

"No issues exist."

State the scope of every claim. Separate confirmed facts from inference.

GitHub is the main brand surface

Avatar: keep the full rounded square.

Banner: keep the original ratio and do not add more text.

Apply the system with restraint

1. Start with Void or Midnight.
2. Use Bone for the main message.
3. Add one Trace path or evidence point.
4. Use Oxblood only for a threshold or warning.
5. Keep one clear claim per composition.
